OWN YOUR POWER

Solar Designed for Your New Home

	Newton Plan Options	Annual Electricity Use ¹	HERS before Solar	SEM Recommended Solar System Size ²	Annual Electric Bill After Solar ²	Net-Zero Home Price *	Federal Tax Credit ³
1	2x6 Walls on insulated slab	\$1,813	51	11.4kW	\$168	\$1,109,000	\$8,791
2	2x6 Walls on sealed crawl	\$1,985	57	12.7 kW	\$168	\$1,129,000	\$9,436
3	Ecopanel Walls ⁴ on insulated slab	\$1,676	46	10.5 kW	\$168	\$1,139,000	\$7,752
4	Ecopanel Walls on sealed crawl	\$1829	51	11.4kW	\$168	\$1,159,000	\$8,791

1 Electricity use estimated utilizing RESNET approved energy modeling software

2 Solar system sized for 100% electricity use offset, monthly service fees charged by Duke Energy Carolinas will still apply

3 Federal Solar Tax Credit modeled at 26% for 2021 and 2022 (The Tax Credit will drop to 22% in 2023)

4 A type of Structural Insulated Panel (SIP). Eco-Panels makes a continuously insulated wall system. This product is produced locally in NC. *Prices include the cost of the land.

. If you plan to use clean energy to charge your electric vehicle at home, you will need some extra solar power. Ask about a system upgrade!

COMMITTED TO YOU

That's why Array is partnering with Southern Energy Management to provide you with smarter home power. Backed with a production guarantee and 20 years of experience in the NC solar industry, you can be 100% confident in your solar upgrade.

We're here to guide you.
